NANO 4-CHROME METAL

Don't you hate it when your brand new stainless steel stove, appliances and other metal surfaces discolour and lose their shine from all the scrubbing and chemicals? Well, no more scrubbing with scourers and harsh chemicals when you apply **Nano4-Chrome Metal**. Keep your stainless steel and metal surfaces looking brand new much longer.

Where can I apply it?

- Stainless Steel Stoves
- Stainless Steel Kitchen Benches
- Stainless Steel Refrigerators and Dishwashers
- Kitchen Appliances (commercial & residential)
- Kitchen and Laundry Sinks
- Chrome Taps and Shower Hose Reels
- Metal Fixtures & Décor (indoor & outdoor)
- All stainless steel items

Why choose Nano4-Chrome Metal over other products?

Safer – Our non-porous products are ethanol-based and the high quality ingredients are 100% all natural & non-toxic.

Greener – Our product is made of quartz sand also known as liquid glass. The natural ingredients are formulated with the environment in mind, so when you choose **Nano4-Chrome Metal** over other products, you are contributing to environmental sustainability.

Simpler – Since it is available in DIY kits, you don't need to be an expert to apply the products. It comes with simple to follow instructions and it is quick & easy to apply.

Smarter – **Nano4-Chrome Metal** will not only keep the surface protected at all times. It will help make cleaning stainless steel surfaces much easier, especially on items such as stoves or commercial kitchens. Once coated, cleaning is made fast and with ease. It's design to reduce up to 90% of cleaning chemical usage saving you money from buying cleaning products. Giving you a smarter choice.

Other features and benefits

- Anti-bacterial
- Easy to clean
- Heat resistant up to 425°C
- Curing time 12 – 24 hours
- Protection up to 5 years

| 200ml Bottle Kit | 40m ² | Stainless steel sinks, stove, fridge, bench tops, BBQ |

Stain resistant

425°C
Heat resistant

Easy to clean

Long life protection

EASY TO APPLY

STEP 1. Before you apply, make sure the surface is clean, dry and free from residue.

STEP 2. Apply the **Nano4-Preclean** product by spraying 15cm away (on a small area 30cm x 30cm at a time), rub over the surface with a micro fibre cloth in a circular motion until dry. While rubbing, look on an angle to check if any streak marks are left, if so, rub over again until clear and dry. Continue until complete. **Nano4-Preclean** is used to remove any microscopic dirt and any previous chemical residues to ensure the glossy surface is clean.

STEP 3. Now apply **Nano4-Chrome Metal** with a brand new micro fibre cloth. Follow the same application process as applying the **Nano4-Preclean**.

STEP 4. Let it dry for 12 – 24 hours before allowing contact with water.

Nano4-Chrome Metal offers a long life protection of up to 5 years for new surface and when applied correctly according to instructions and maintained according to Nano4Life's maintenance guide. However, you may need to re-apply earlier depending on the harshness of the environment, the usage and for optimum results.

TIPS

- If the surface is dirty, clean it first with traditional methods before applying the **Nano4-Preclean**.
- Avoid applying the products on a very hot or windy day if possible (preferably in the shade and in a well ventilated area)
- Apply on a small section at a time so the liquid doesn't dry up before you rub over the surface.
- If you think you've missed a spot, go back and re-apply to ensure all areas are coated.
- Before you apply **Nano4-Chrome Metal**, spray 3 pumps on the new micro fibre cloth. Follow the instructions and apply accordingly.
- If you're unsure please visit www.nano4life.com.au for our application video or contact us.

PRECAUTIONS – DO NOT SWALLOW

- Always apply in a well ventilated area
- Apply when surface temperature is between 5 – 30°C
- Do not let products dry up before polishing
- Avoid moisture contact with the surface after application until fully cured for 24 hours for optimum results
- Wear gloves and protective clothing
- Store in a cool and dry location away from direct sunlight
- Wash hands after application
- Highly flammable
- Keep ignition sources away – Do not smoke
- Keep out of reach of children
- PH Value 14 or above cleaner can destroy the effect
- **Nano4-Chrome Metal** does not protect against etching, wear and high water pressure 50 bar and above.

CHEMICAL COMPOSITION

| | | |
|-----------------------------------|--|----------|
| Ethanol | (C ₂ H ₆ O) | 98% w/w |
| Silicon Dioxide | (SiO ₂) | 0.4% w/w |
| Reaction Mass of Dimethyl Adipate | (C ₈ H ₁₄ O ₄) | 0.2% w/w |
| Dimethyl Glutarate | (C ₇ H ₁₂ O ₄) | 0.4% w/w |
| Methyl Ethyl Ketone | (C ₂ H ₈ O) | 1% w/w |
