# NANO 4-YACHT

Want to be able to keep your Jet Ski, Boat or Yacht looking clean all the time? Then applying **Nano4-Yacht** will help maintain the pristine look so you won't have to clean as often. It can be annoying to see fallout from the sky from planes that leave dirty particles everywhere on your Boat or Yacht but once it has been applied with **Nano4-Yacht**, it will make it that much more easier to clean plus you won't have to do it as often.

**Where can I apply it?**

- Polycarbonate
- Fibreglass
- Neopren
- Hypalon
- External Plastic Ship Surface

**Why choose Nano4-Yacht over other products?**

**Greener** – Our product is made of quartz sand also known as liquid glass. The natural ingredients are formulated with the environment in mind, so when you choose **Nano4-Yacht** over other products, you are contributing to environmental sustainability.

**Simpler** – Since it is available in DIY kits, you don't need to be an expert to apply the products. It comes with simple to follow instructions and it is quick & easy to apply.

**Smarter** – **Nano4-Yacht** offers a full protection against UV rays, salt water, stain resistant, frost resistant, chemical resistant and abrasion resistant. Giving you a smart choice to protect your boats and yachts.

**Other features and benefits**

- Non-toxic
- Easy to clean
- Paint protection
- Ethanol base
- Curing time 12 – 24 hours
- Protection up to 5 years

200ml Bottle Kit	40m2	20ft Boat or Yacht
500ml Bottle Kit	100m2	40ft Boat or Yacht

UV protection

Protect against salt water

Easy to clean

Long life protection

## EASY TO APPLY

**STEP 1.** Before you apply, make sure the surface is clean, dry and free from residue.

**STEP 2.** Apply the **Nano4-Preclean** product by spraying 15cm away (on a small area 30cm x 30cm at a time), rub over the surface with a micro fibre cloth in a circular motion until dry. While rubbing, look on an angle to check if any streak marks are left, if so, rub over again until clear and dry. Continue until complete. **Nano4-Preclean** is used to remove any microscopic dirt and any previous chemical residues to ensure the glossy surface is clean.

**STEP 3.** Now apply **Nano4-Yacht** with a brand new micro fibre cloth. Follow the same application process as applying the **Nano4-Preclean**.

**STEP 4.** Let it dry for 12 – 24 hours before allowing contact with water.

**Nano4-Yacht** offers a long life protection of up to 5 years for new surface and when applied correctly according to instructions and maintained according to Nano4Life's maintenance guide. However, you may need to re-apply earlier depending on the harshness of the environment and for optimum results.

## TIPS

- If the surface is dirty, clean it first with traditional methods before applying the **Nano4-Preclean**.
- Avoid applying the products on a very hot or windy day if possible (preferably in the shade and in a well ventilated area)
- Apply on a small section at a time so the liquid doesn't dry up before you rub over the surface.
- If you think you've missed a spot, go back and re-apply to ensure all areas are coated.
- Before you apply **Nano4-Yacht**, spray 3 pumps on the new micro fibre cloth. Follow the instructions and apply accordingly.
- If you're unsure please visit [www.nano4life.com.au](http://www.nano4life.com.au) for our application video or contact us.

## PRECAUTIONS – DO NOT SWALLOW

- Always apply in a well ventilated area
- Apply when surface temperature is between 5 – 30°C
- Do not let products dry up before polishing
- Avoid moisture contact with the surface after application until fully cured for 24 hours for optimum results
- Wear gloves and protective clothing
- Store in a cool and dry location away from direct sunlight
- Avoid applying in windy conditions
- Wash hands after application
- Highly flammable
- Keep ignition sources away – Do not smoke
- Keep out of reach of children
- PH Value 14 or above cleaner can destroy the effect
- **Nano4-Yacht** does not protect against etching, wear and high water pressure 50 bar and above

## CHEMICAL COMPOSITION

Ethanol	(C <sub>2</sub> H <sub>6</sub> O)	98% w/w
Silicon Dioxide	(SiO <sub>2</sub> )	0.4% w/w
Reaction Mass of Dimethyl Adipate	(C <sub>8</sub> H <sub>14</sub> O <sub>4</sub> )	0.2% w/w
Dimethyl Glutarate	(C <sub>7</sub> H <sub>12</sub> O <sub>4</sub> )	0.4% w/w
Methyl Ethyl Ketone	(C <sub>2</sub> H <sub>8</sub> O)	1% w/w
